PROFESSIONAL SUMMARY

SEC-accredited Electronics Engineer and IEEE Professional Member. Works across embedded systems, PCB design, and robotics prototyping, with recent experience in industrial automation and vision-inspection systems from a manufacturing environment. Has trained over 200 learners in electronics and embedded systems through university and academy programs.

PROFESSIONAL EXPERIENCE

Alamat Robotics

Apr 2019 – Present

Technical Consultant

- Advised on technical direction for robotics and IoT prototypes, from requirements through testing and iteration.
- Designed custom PCBs (schematic and layout) and assembled prototypes using SMT/THT methods.
- Programmed ESP32/Arduino firmware, integrated sensors and actuators, and debugged hardware-firmware interfaces.
- Delivered training workshops in electronics, Arduino, and digital manufacturing for 200+ learners across workshops and programs.

Princess Nourah bint Abdulrahman University

Jan 2025 – Jun 2026

Lecturer

- Taught the Mechatronics course for the Product Design department across six divisions, 100+ students.
- Designed practical assignments using Tinkercad and managed grading across all divisions.

The National Company for Glass Industries (Zoujaj)

Dec 2024 – Dec 2025

Electronics Engineer

- Worked on TIAMA vision-inspection machines (MX4, MULTI4, MCAL4) and MSK palletizing and robotic systems.
- Built an internal Python/Streamlit tool for breakdown logging and a separate React/Node.js tool for maintenance reporting.

Tuwaiq Academy

Jul 2024 – Aug 2024

Instructor, Robotics and Embedded Systems

- Trained student teams in robotics and embedded systems; mentored teams to gold medals at IITEX.

EDUCATION

Bachelor's Degree, Applied Electronics and Control Systems Engineering

2023

Technical College of Riyadh

Diploma, Industrial Electronics and Control

2021

Technical College of Riyadh

TECHNICAL SKILLS

Embedded Systems: ESP32/Arduino, STM32, Embedded C/C++

PCB Design: EasyEDA, KiCad, SMT/THT assembly

Industrial Systems: Vision inspection, sensor integration, fault diagnosis, calibration, PLC programming

Protocols: MQTT, BLE, LoRa/LoRaWAN, UART/SPI/I2C

Programming: Python (Streamlit), React, Node.js

CERTIFICATIONS

- Electronics Engineer Accreditation, Saudi Council of Engineers (SEC), 2024
- Professional Member, IEEE, 2020
- Training of Trainers (ToT), Sahm Training Center, 2025
- Engineering Solutions Design and Manufacturing, Tuwaiq Academy, 2024
- MEMS, Academy 32, 2024
- Internet of Things, Tuwaiq Academy, 2024
- 3D Printing, Tuwaiq Academy, 2024
- PLC Programming, SME, 2021
- Full Stack Engineer, Smart Methods, 2021

PROJECTS

- IoT Smart Parking Management System – 2023
- Smart Safety Helmet with Fall Detection and GPS – 2024
- IoT Water Monitoring System (Graduation Project) – 2023
- Custom Robotics Mainboard PCB – 2021
